LEARN OCCLUSION

This enjoyable, exciting practical course takes the mystery out of occlusion. Clarifying occlusion makes dentistry more understandable. Learn to help bruxers, patients with headaches and TMJ issues, loose teeth, and occlusal wear, patients requiring simple or complex restorations. Enjoy amazing visual presentations, with direct non-critical feedback provided. Participants will be shown both theory and practical applications of occlusion, and will immediately be able to incorporate this in their daily work.

DR STUART ORTON-JONES UK

An experienced teacher with a passion for restorative dental care, Stuart is an engaging respected and entertaining lecturer. His presentations are refined & concise. Stuart's considerable experience has seen him teach Implantology, applied Anatomy & Occlusion throughout the world. We welcome him to NZ warmly.

COURSE SUMMARY - OCCLUSION

This is a Clinically Orientated Practical Course.

Intended to help participants identify and solve Occlusal related problems such as cracked teeth, broken restorations, anterior chipping.... and so on.

With a focus on Practical exercises, lecture time will be regular but brief, with practical exercises dominating the event.

Numerous Case Presentations will form the skeleton of the 4-days, allowing practical tips and lessons to be taken immediately into your clinical practice.

Further information about Stuart can be obtained

INSTITUTE OF DIGITAL PROS

Established in 2018, with an intention of helping clinicians into Digital Prosthodontics, this is the brainchild of Dr Craig Campbell.

We provide Courses and Learning Experiences intended to allow everyday Dentists to upskill their understanding of the progression from traditional Prosthodontics to Current Digital Environments.

University education will always provide the basics, but beyond this it is difficult to access balanced clinical education which incorporates current literature. This is the purpose for which the Institute of Digital Prosthodontics serves.
